

The never-ending evolution of power supplies!

Ultra-Compact AC/DC Programmable Power Supply PCR-WEA/WEA2 Series

NEW

Compact size: 6 kVA in 6U size (PCR6000WEA2)

Up to 36 kVA in one single unit

100% regenerative capability (for "R" models, PCR-WEA2R)

Mix-and-match parallel operation up to 144 kVA

Flexible digital interface: LAN (LXI), USB, RS232C, GPIB (factory option)

Power line disturbance simulation

Power-saving function

DC output (100% of rated power)

Output frequency up to 5 kHz

Output rating: AC 0 to 320 Vrms, DC 0 to ± 452 V

THE EVOLUTION

More power, more speed, more freedom! While maintaining the high-power density of 6 kVA/6U and 36 kVA in a single housing unit, the maximum output voltage, response characteristics, and load stability have been improved!

Ultra-Compact AC/DC Programmable Power Supply PCR-WEA/WEA2 Series

The PCR-WEA/WEA2 is a series of multifunctional switching AC power supplies that combines accurate, high-power output with an ultra-compact design. The 15 model line-up ranges from 1 kVA to 36 kVA AC/DC with single & 3-phase variable output from 6 kVA and up. The PCR-WEA2 also features a regenerative mode*¹ that can drastically reduce power consumption and cut operating costs. The PCR-WEA2/WEA2R also supports mix-and-match parallel operation*² up to 144 kVA for large-scale test systems. Output frequency up to 5 kHz is also available with all models, which is critical for AC applications in avionic industries.

- Compact size: 6 kVA in 6U frame (PCR6000WEA2)
- Up to 36 kVA in a single unit (PCR36000WEA2)
- 100% regenerative-power capability*¹
- Mix-and-match parallel operation up to 144 kVA
- Flexible digital interface:
LAN (LXI), USB, RS232C, GPIB (option)
- Power line disturbance simulation features
- Sequence function for advanced simulation
- External analog, digital control function (standard)
- Power-saving function
- DC output (100% of rated power)
- Output frequency up to 5 kHz
- Output rating: AC 0 to 320 Vrms, DC 0 to ± 452 V

*¹: Only "R" models (PCR-WEA2R) with 3-phase 200 V input.
For regeneration within the installation site only.

*²: Parallel operation is available for 6 kVA models and up, with a maximum of 4 units. Same model combination is not required.

PWM Inverter Type - Programmable AC Power Supply

The PCR-WEA/WEA2 Series brings new innovations to the power-electronics industry.

Compact Size!

Compared to our previous PWM models, the size of the PCR-WEA has been drastically reduced by 60%. Efficiency has also been increased by approximately 7%, for an overall high efficiency of approximately 85%.

Extremely Power Dense 36 kVA Chassis

The PCR-WEA/WEA2 form factor has been significantly improved, occupying the absolute minimum amount of precious space in your testing facility. The form factor is even further optimized in high power models.

● Installation area comparison (36 kVA)

The PCR-WEA/WEA2 is only 1/6th the size of the PCR-LE!

● Weight comparison (36 kVA)

The PCR-WEA/WEA2 is approximately 80% lighter than the PCR-LE!

Up to 144 kVA with Parallel Operation

Parallel operation is available on all models by simply connecting an optional parallel operation cable. This feature is available even among different models for a wide range of high power.

**Same input voltage required for 6 kVA models and higher.*

● Mix-and-match parallel operation (example)

● Connection diagram

Low Ripple Noise

Achieves an extremely low switching noise for a PWM inverter-type AC power supply, with ripple noise as low as 0.25 Vrms. The PCR-WEA series even boasts similar noise performance with the PCR-LE/LE2 linear amplifier power supply series. The compact, high-power design of the PCR-WEA/WEA2 has been achieved with absolutely no compromises to ripple noise performance.

100% Regeneration Capability, No Time Limit

The PCR-WEA2R models are capable of 100% power regeneration. The power regeneration feature is available with absolutely no reverse load flow time limit. (30% for PCR-LE/LE2)

**Regeneration is limited within installation site. Only available in "R" models (PCR-WEA2R) with 3-phase 200 V input.*

Output Frequency up to 5 kHz

It has a maximum output frequency up to 5 kHz for critical applications in the defense and avionics industries. The frequency performance of the PCR-WEA allows for simulation of sharp voltage fluctuations required for airborne electronic equipment testing. Furthermore, the compact 6kVA/6U form factor allows for the easy preparation of an automated, one-rack testing system without requiring a costly, specialized power source installation space.

LAN, USB, RS232C Standard Digital Interface

The PCR-WEA/WEA2 series includes a flexible digital interface for users utilizing LAN, USB, and RS232C communication interfaces (GPIB factory option available). LAN connection is LXI compliant, allowing you to monitor and control your device wherever you are via computer, smartphone, or tablet web browser. This feature is particularly important when conducting critical AC tests in anechoic chambers/shield rooms. Additionally, the PCR-WEA can be controlled directly with easy remote-control software for customers with limitations in external communication.

● Wired LAN connection (optical cable)

● Wireless LAN connection

DC Output 100% of Rated Power

The PCR-WEA/WEA2 series enables DC output up to 100% of the AC rated power output.

DC output: **100%** of AC output rating

Required output capacity **6 kVA**

PCR6000WEA2

DC : 6 kW

Load

Power Saving Mode *6 kVA models and higher

● Sleep mode

If the PCR-WEA/WEA2 does not detect output for a certain amount of time, the power unit will go into "sleep mode" and cut power consumption.

ZZZ..... Sleep mode screen is displayed.

● Power-saving mode

The power-saving feature allows the PCR-WEA to cut the costs of operation by drawing power from only the necessary power modules required to reach the output setting.

[Example]
Only 6 kVA drawn from the 36 kVA model

Modular design allows for simple maintenance

Each separate power module can be removed and replaced for maintenance and calibration. *For models 6 kVA and higher

Power Line Error Simulation

The PCR-WEA/WEA2 series can simulate various power line abnormalities such as power outages, voltage drops (dips) and voltage increases (pops). This feature is useful for the testing of power-source switches and various electronic devices.

Power outages

increased voltage (pops)

decreased voltage (dips)

Built-in parallel operation driver software! Easy parallel operation with a single connection cable.

The PCR-WEA/WEA2 series can be easily configured in a parallel connection with a single cable* per connection for all models 6 kVA and above. This cable can be used in synchronization with a power-interlock cable* to control the ON/OFF status of master/slave units. *Optional

Applications

For Standard Compliance Testing

● Single-phase system

This system can simulate various conditions of phenomena occurring in AC power environments. It can be used for immunity tests of electrical and electronic devices, which are connected to a low-voltage distribution system, or which have DC power input ports, under the standard conditions as specified to the right. The test conditions can be set outside the standard range, allowing the system to be used for preliminary tests prior to standard tests, immunity-margin tests, and stress tests. The KHA3000 harmonic/flicker analyzer combines a PCR-WEA/WEA2 Series AC power supply, LIN Series line-impedance network*1, DSI series IEC dip simulator*2 and application software (Refer to pg.8), allowing tests that conform to IEC standards and JIS standards.

* Immunity testing for units with 16 A/phase except for those required by IEC61000-4-34

*1 Conforms to the standard when used in combination with IEC Dip Simulator DSI series. If using the PCR-WEA/WEA2 alone, the voltage dips and short-time power failures are preliminary tests.

*2 110 %, 95.2 %, 93.5 %, 90 %, 87 %, 80 %, 74 %, 71 %, 66 % need to respond to sudden changes of 1 μs to 5 μs. The voltage response of PCR-WEA/WEA2 is more than 40 μs at FAST, which is a preliminary test.

*3 Must support output impedance greater than 100 kΩ. The PCR-WEA/WEA2 output impedance is less than 100 kΩ and therefore designed for preliminary testing purposes.

*4 The device between the range of 16A to 75 A requires having the capability of rapid change with 1 μs to 5 μs. The device exceeding 75 A is not required to have the capability of rapid change with 1 μs to 5 μs. (It is relaxed to 1 μs to 50 μs for the device exceeding 75 A)

The latest standards for IEC61000-4 supported!

"Quick Immunity Sequencer 2" (model name: SD009-PCR-LE/WE) is an application software for immunity testing with the AC power supply PCR-WEA/WEA2 series system, based on the power line disturbance standard (IEC61000-4 Series) for the immunity testing of the EMC standard. Not only can it be used for compliance testing based on the latest standards or for some types of preliminary testing, but the software can be also employed for advance checking in development phases and for immunity margin tests, because it allows extended testing conditions to be set as needed.

Avionics Test Software

SD012-PCR-LE/WE

Supporting compliance testing of avionics test standards.

The test pattern can be conducted from the library.

Supported Standards

Military Standard: MIL-STD-704A/E/F

Civilian Standard: RTCA DO-160F/G

Civilian Standard: JIS W0812:2004

- Easy configuration - just select standard from library
- Test-step editing and saving - convenient for development and evaluation required with marginal testing
- Test-condition reporting function - enables test history logging
- Remote control via LAN

Test standards have been established that electrical components and parts installed on aircraft must meet. All electrical components and parts installed on the fuselage must comply with these standards, but the applicable test standards vary according to the intended use and purpose. Test standards can be largely divided into two types: military standards and civilian standards. In addition, aircraft manufacturers sometimes apply their own set of private standards. Avionics Test Software [SD012-PCR-LE/WE] is a software application that supports aircraft test standards, and is used to control the PCR-WEA/WEA2 Series that enables you to conduct the test standards for the MIL-STD-704, RTCA/DO-160 and JIS W0812 standards. Test patterns are library-based, which enables tests to be easily run by simply selecting the wiring configuration and the type of test. In general, the 400 Hz AC power supply is used for large aircrafts, and the 28 V DC power supply is used for the small aircrafts.

"Wavy" sequence creation software

Wavy is an application software that supports sequence creation and the operation for Kikusui power supplies and electronic loads.

Wavy allows you to create and edit sequences visually with a mouse without programming knowledge.

- Makes it easier to create or edit the test-condition file required for the sequence operation.
- By using the storage function of test-condition data file, it enables you to manage the test condition of the standard routine test.
- The progress of execution sequence will be displayed in "practical dialogue" with the setting value and the cursor.
- It is possible to observe the intuitionistic output through the "monitor graph" that plots the ongoing monitor value.
- You can save the acquired monitor data as a test result.
- Added "waveform image" window let's you easily keep track of the AC signal.
- Allows you to edit and create a new arbitrary waveform easily. You can instantly write and then output the created arbitrary waveform.
- You can select or deselect the pause function, trigger function, AC waveform etc. as necessary.

Remote-control software for Windows tablet

SD021-PCR-LE/WE (RMT CONT SOFTWARE FOR PCR-LE/WE)

Windows tablet can be used as a remote controller !

The SD021-PCR-LE/WE is software that can control the PCR-WEA/WEA2 Series. It is capable of changing the setting condition of the "wiring method", "output mode", "voltage range", "voltage value", and "frequency value". And the settings changed by remote control can be saved and recalled. Moreover, it can display the measurement value of the AC power supply. Remote operation and control of the AC power supply can be easily achieved from a distance.

*1 output L range, output H range

*2 Specification guaranteed voltage range is 1 V to 160 V/ 2 V to 320 V (AC) and 1.4 V to 226 V/ 2.8 V to 452 V (DC)

*3 At ambient temperature of 23 °C±5 °C.

*4 No load, output frequency 45 Hz to 65 Hz

*5 When the phase angle of 120° of each phase.

*6 For output phase voltage of 100 Vac to 160 Vac/ 200 Vac to 320 Vac and output voltage of 100 Vdc to 226 Vdc/ 200 Vdc to 452 Vdc, output current is reduced with output voltage. When the output frequency is between 1 Hz and 40 Hz, the output current is reduced by the output frequency. The output current is 70 % at 1 Hz.

*7 On the 500 Hz limit model, the frequency is limited to 1 Hz to 500.0 Hz for three-phase output.

*8 Within ±(0.4° + 2.5 μs×360°×fo×10⁻³). The following show the angles obtained by calculating the expression with the specified frequency within ± 0.5° (at 60 Hz output), within ± 0.8° (at 400 Hz output)

*9 With no load at 23°C±5°C.

*10 When the output voltage is 100 V or 200 V, the output current is the rated value, the load power factor is 1, and the output frequency is between 40 Hz and 1 kHz.

*11 Repeated output is possible when the crest factor is 4.

*12 125 Vac/ 250 Vac (output L range/ H range)

*13 Waveform bank 0, at 1 Hz to 500 Hz.

Regeneration Function

Only for three-phase, three-wire input models with R at the end of the model name. Single-phase output models and three-phase, four-wire input models do not have a regeneration function. For regeneration within the installation site only.

*1 Does not apply to specially ordered or modified products.

*2 Only on models that have the CE marking on the panel.

*3 This is Class A equipment. This product is intended for use in an industrial environment. This product may cause interference if used in residential areas. Such use must be avoided unless the user takes special measures to reduce electromagnetic emissions to prevent interference to the reception of radio and television broadcasts.

*4 This is Group 1 equipment. This product does not generate and/or use intentionally radio-frequency energy, in the form of electromagnetic radiation, inductive and/or capacitive coupling, for the treatment of material or inspection/analysis purpose.

*5 This does not apply to the PCR6000WEA2R.

*6 This is Class I equipment. Be sure to ground this product's protective conductor terminal. The safety of this product is only guaranteed when the product is properly grounded.

*7 Pollution is addition of foreign matter (solid, liquid or gaseous) that may produce a reduction of dielectric strength or surface resistivity. Pollution Degree 2 assumes that only non-conductive pollution will occur except for an occasional temporary conductivity caused by condensation.

Options

■ GPIB Interface Boards

IB07-PCR-WE

This board enables you to control the PCR-WEA/WEA2 Series over GPIB.

■ Parallel-operation Cable (1 m)

PC01-PCR-WE

■ Power-sync Cable (1 m)

LC01-PCR-LE

■ Base Hold Angles

OP03-KRC

■ External-control Connector

OP01-PCR-WE (for DIGITAL I/O)

■ External-control Connector

OP02-PCR-WE (for ANALOG I/O)

■ Rack Mount Brackets

For PCR1000WEA/2000WEA/3000WEA2

KRB3-TOS (EIA inch rack)

KRB150-TOS (JIS millimeter rack)

For PCR6000WEA2(R)

For PCR12000WEA2(R)

KRB9 (EIA inch rack)

KRB400-PCR-LE (JIS millimeter rack)

■ Output Terminal Box **NEW**

Easy to select output mode “single-phase, single-phase 3-wire, and 3-phase” without re-wiring.

- 2 lineups depend on output power, “6 kVA to 18 kVA model” and “24 kVA to 36 kVA model”.
- Toggle between “single-phase” or “single-phase 3-wire/3-phase” output terminal using main unit switch.

An output terminal box gives output mode selection “single-phase, single-phase 3-wire and 3-phase” of PCR-WEA/WEA2 series. Selectable switches equipped in its body achieve multi-phase output without output cable re-wiring.

■ Sequence Creation Software "Wavy" SD032-PCR-WE (Wavy for PCR-WE)

**The software that further enhances the waveform generation and sequence functions of the PCR-WEA/WEA2 Series.
Easy sequence control without programming knowledge!**

Wavy is an application software that supports sequence creation and operation for Kikusui power supplies and electronic loads. Wavy allows you to create and edit sequences visually with just a mouse. Real-time graph-monitor function is equipped and enables monitoring and logging values of voltage and current. It is possible to operate the power supply with the feeling of remote control by direct control function.

The never-ending evolution of power supplies!

● Comparison with previous model

Model	PCR-WE/WE2 Series	PCR-WEA/WEA2 Series	NEW
Firmware	Ver 1.24	Ver 3.12	
Basic function	Output voltage 155/310 Vrms $\pm$ 219/438 Vdc	Output voltage 160/320 Vrms $\pm$ 226/452 Vdc	
Applied functions	Same value regardless of the lower limit response setting for output impedance (reactance component).	Lower limit of output impedance (reactance component) FAST : reduced by 50 % MED : no change SLOW : 3x	
Interface	None	Addition of analog monitor output option (factory option)*	

*On PCR6000WEA and higher models, analog monitor output (factory option) is possible.
